

**MEETING MINUTES  
LANCASTER COUNTY BOARD OF COMMISSIONERS  
TUESDAY DECEMBER 12, 2023, AT 9:00 AM  
COUNTY-CITY BUILDING, ROOM 112**

**COMMISSIONERS: Christa Yoakum, Chair; Sean Flowerday, Vice Chair;  
Roma Amundson, Matt Schulte and Rick Vest**

*Advance public notice of the Board of Commissioners meeting was posted on the County-City Building bulletin board and the Lancaster County, Nebraska website, emailed to the media, and published in the Lincoln Journal Star print and digital editions on December 8, 2023.*

Commissioners present: Roma Amundson, Sean Flowerday, Matt Schulte, Rick Vest, and Christa Yoakum

Others present: David Derbin, Chief Administrative Officer; Kristy Bauer, Deputy Chief Administrative Officer; Candace Berens and John Ward, Deputy County Attorneys; Matt Hansen, County Clerk; and Meggan Reppert-Funke, County Clerk's Office

Yoakum called the meeting to order at 9:02 a.m., and the Clerk announced the location of the Nebraska Open Meetings Act.

**1) MINUTES**

A. Approval of the minutes of the Board of Commissioners meeting held on December 5, 2023.

**MOTION:** Amundson moved and Flowerday seconded approval of the minutes. Vest, Amundson, Schulte, Flowerday, and Yoakum voted yes. Motion carried 5-0.

**2) CLAIMS**

A. Approval of the claims processed through December 12, 2023.

**MOTION:** Vest moved and Flowerday seconded approval of the claims. Flowerday, Vest, Amundson, Schulte, and Yoakum voted yes. Motion carried 5-0.

**3) CONSENT ITEMS** - These are routine business items that are expected to be adopted without dissent. Any individual item may be removed for special discussion and consideration by a Commissioner or by any member of the public without prior notice. Unless there is an exception, these items will be approved as one with a single vote of the Board of Commissioners. These items are approval of:

A. Grant contract with Mentoring Plus for the Mobile Home Sports program in the amount of \$31,836. (Funding is from Juvenile Justice Prevention Funds from the date of sponsor execution through June 30, 2024.) (C-23-0954)

B. Amendments to the following County contracts:

1. C-21-0724 with Vigilant Solutions LLC for mobile license plate reader system and software licenses. (SS-160. The amendment renews the contract from January 2, 2024, through January 1, 2025. The cost to the County is not to exceed \$46,493.) (C-23-0958)
2. C-18-0193 with The Home Depot U.S.A. Inc for maintenance, repair, operating (MRO) supplies, industrial supplies, and related products. (OMNIA (Previously U.S. Communities) Serial No. 16154-RFP, MOU022. The amendment renews the contract from January 1, 2024 through December 31, 2024. The estimated cost to the County is not to exceed \$5,000.) (C-23-0961)

**C. Right-of-way contracts with the following:**

1. Douglas D Meinke, Southwest 142nd Street and West Stagecoach Road, in the amount of \$649. (Project 22-31 / V-002) (C-23-0955)
2. Chrastil Farms Inc, Southwest 142nd Street and West Panama Road, in the amount of \$1,180 (Project 22-31 / V-003) (C-23-0956)
3. Roger C Johnson, Southwest 142nd Street and West Panama Road, in the amount of \$1,144. (Project 22-31 / V-003) (C-23-0957)
4. Katherine C and Marvin W Nielsen, Northwest 140th Street and West Adams Street, in the amount of \$12.50 (Project 24-21 / M-072) (C-23-0962)

**D. Change Order 5 to County contract C-23-0451 with Pavers Inc due to adding a location for patching (Project 23-06; Bid 23-109, in an amount not to exceed \$9,757.50). (C-23-0965)**

**E. Received and placed on file the following reports:**

1. 2023 Annual Inventory of County Personal Property (Fixed Assets).
2. County Clerk

**F. Setting a public hearing on Tuesday, December 19, 2023 at 9:00 a.m. in Room 112 of the County-City Building (555 S. 10th Street, Lincoln) regarding Text Amendment 23012 to amend the Lancaster County Zoning Resolution and Lancaster County Subdivision Resolution to require all new local streets in the county to be private roadways.**

**MOTION:** Vest moved and Amundson seconded approval of the consent items. Schulte, Flowerday, Vest, Amundson, and Yoakum voted yes. Motion carried 5-0.

**4) PUBLIC HEARING**

**A. Amending the Lancaster County budget so that spending authority can be established for the Assemble Lincoln Convention Center Fund. (See correlating item 5A)**

Yoakum opened the public hearing.

The Clerk administered the oath to Dennis Meyer, Budget and Fiscal Director. Meyer explained the correlating resolution will add a fund to the County budget. Board members would still need to establish spending authority, which he recommended setting at \$500,000. Contributions could be made to the fund or funds could be transferred from a different fund.

Yoakum closed the public hearing.

**B. Applications for a Class C liquor license for Seven Willows LLC, dba Seven Willows (7600 Panama Road, Hickman), and a corporate manager's liquor license for Heidi Wubbels. (See correlating item 5B)**

Yoakum opened the public hearing.

The Clerk administered the oath to Heidi Wubbels, the applicant. Wubbels described her new wedding venue business. The barn on the property will seat up to 400 guests. Yoakum asked if Wubbels had taken any training. Wubbels answered no, but she has training materials from the Liquor Control Commission. Yoakum asked about discrepancies in her application. Wubbels said she forgot to list some offenses and inadvertently left off some of her previous addresses.

Schulte asked when the venue would be ready for events, and Wubbels answered in the next few weeks. Vest asked Wubbels to explain her plans for alcohol sales. Wubbels said the Liquor Control Commission recommended applying for a Class C license so she could gift alcohol that is consumed off site. She has no

plans to sell alcohol for consumption off site. Flowerday asked if the Planning Department or Sheriff's Office opposed the liquor license, and Board members answered no.

Yoakum closed the public hearing.

## **5) NEW BUSINESS**

- A.** Resolution in the matter of supplementing appropriations for the Assemble Lincoln Convention Center Fund in the amount of \$500,000. (R-23-0103)

**MOTION:** Vest moved and Amundson seconded approval of the resolution. Amundson, Schulte, Flowerday, Vest, and Yoakum voted yes. Motion carried 5-0.

- B.** Resolution in the matter of an application for a Class C liquor license for Seven Willows LLC, dba Seven Willows (7600 Panama Road, Hickman), and a corporate manager's liquor license for Heidi Wubbels. (R-23-0104)

**MOTION:** Amundson moved and Schulte seconded approval of the resolution. Vest, Amundson, Schulte, Flowerday, and Yoakum voted yes. Motion carried 5-0.

- C.** Resolution in the matter of amending the Lancaster County Purchasing Manual to encourage County agencies to use their purchase authority to support local businesses when possible. (R-23-0106)

Peter Kroll, County Purchasing Agent, described the resolution and the intent is to support local businesses.

**MOTION:** Amundson moved and Vest seconded approval of the resolution.

Flowerday asked if purchasing local would be a mandate, and Kroll answered it would allow departments to purchase from local businesses if the expense was deemed reasonable.

**ROLL CALL:** Flowerday, Vest, Amundson, Schulte, and Yoakum voted yes. Motion carried 5-0.

- D.** Resolution in the matter of adopting benefits for County employees in the Unclassified Service. (R-23-0105)

Ashley Bohnet, Deputy County Attorney, explained the reasons for the resolution. Education loan forgiveness for the psychologist was previously included in the personnel rules but should have been under its own resolution. The resolution will also add a hiring and retention bonus for two positions.

Scott Etherton, Mental Health Crisis Center Director, further described the hiring and retention bonus. Funding is through a one-time grant from the State through the Nebraska Behavioral Health Regions. Half of the \$10,000 bonus would be distributed in January and the rest would be distributed later. Board members and Etherton discussed specifics of when the money must be spent.

**MOTION:** Vest moved and Flowerday seconded approval of the resolution. Schulte, Flowerday, Vest, Amundson, and Yoakum voted yes. Motion carried 5-0.

- E.** Resolution in the matter of adopting a policy governing the expenditure of public funds for plaques, certificates of achievement, items of value and recognition meals for elected officials, appointed officials, employees, and volunteers. (R-23-0107)

**MOTION:** Vest moved and Amundson seconded approval of the resolution. Amundson, Schulte, Flowerday, Vest, and Yoakum voted yes. Motion carried 5-0.

- F. Legal engagement agreement with Cline Williams Wright Johnson & Oldfather LLP to provide professional legal services to Lancaster County. (C-23-0959)

**MOTION:** Amundson moved and Flowerday seconded approval of the agreement. Vest, Amundson, Schulte, Flowerday, and Yoakum voted yes. Motion carried 5-0.

- G. Grant Contract with Domesti-PUPS to promote its I Love My Dog Expo for an amount not to exceed \$5,000 from the Visitors Promotion Fund. (C-23-0963)

Vest stated the funding is through the Visitors Promotion Fund to help raise awareness of the event.

**MOTION:** Vest moved and Amundson seconded approval of the contract. Flowerday, Vest, Amundson, Schulte, and Yoakum voted yes. Motion carried 5-0.

- H. Interlocal Agreement with Lancaster County and the Board of Regents of the University of Nebraska on behalf of the University of Nebraska-Lincoln Institute of Agriculture and Natural Resources, Cooperative Extension Division ("Nebraska Extension") to allocate funding and resource responsibilities regarding the administration of the Nebraska Extension education program in Lancaster County. (C-23-0964)

Dave Varner, Nebraska Extension Associate Director, described the history of Nebraska Extension and its relationship with the County. The interlocal agreement is to extend the current agreement. The main difference in the new agreement is that all employees will eventually transition to university employees from County employees. Board members agreed with the change.

**MOTION:** Vest moved and Amundson seconded approval of the agreement.

Yoakum commended Varner on the work of the office. Varner introduced Cindy Zluticky and Karen Wobig, Nebraska Extension staff who were in attendance.

**ROLL CALL:** Schulte, Flowerday, Vest, Amundson, and Yoakum voted yes. Motion carried 5-0.

- I. Agreement with the Nebraska State Patrol for the Lancaster County Sheriff's Office to provide tactical flight officer support to the air wing division of the Nebraska State Patrol. (The term of the agreement is five years. There is no estimated cost to the County.) (C-23-0966)

Terry Wagner, County Sheriff, described reasons for the agreement, which will allow County deputies to assist in air wing division calls. The County benefits greatly from the State program, and this is a way to support that work. Wagner discussed recent pursuits where the two agencies worked together.

**MOTION:** Vest moved and Schulte seconded approval of the agreement. Amundson, Schulte, Flowerday, Vest, and Yoakum voted yes. Motion carried 5-0.

- J. The following contracts for the annual supply of motor oils and lubricants. (Bid 23-152. The contracts shall be effective for one year upon execution. The cost to the County shall not exceed \$50,000 for all contracts.)
1. Sapp Bros Inc (C-23-0951)
  2. Safety Kleen Systems (C-23-0952)
  3. Nebraska Iowa Supply (C-23-0953)

**MOTION:** Vest moved and Schulte seconded approval of the contracts.

Pam Dingman, County Engineer, described the reasoning for the contracts.

**ROLL CALL:** Vest, Amundson, Schulte, Flowerday, and Yoakum voted yes. Motion carried 5-0.

- K.** Recommendation from the County Engineer to award a contract to Pavers Inc for the annual supply of asphaltic concrete in the amount of \$50,000. (B-23-273)

Dingman stated the contract is for hot asphalt to patch roads.

**MOTION:** Schulte moved and Vest seconded approval of the recommendation. Flowerday, Vest, Amundson, Schulte, and Yoakum voted yes. Motion carried 5-0.

- L.** Recommendation from the Assemble Lincoln Standing Committee regarding funding of upfront project costs for Convention Center development.

Flowerday stated the recommendation is to put \$335,000 of American Rescue Plan Act (ARPA) interest dollars towards the Assemble Lincoln Convention Center Fund. Assemble Lincoln committee members are raising additional funding.

Vest asked Flowerday to describe the consultant that will be hired. Flowerday said the consultant also assisted in development of the Pinnacle Bank Arena. He further discussed the services they will provide. Flowerday added the convention center will be funded by a turnback tax, made possible by a recent legislative change. The convention center will increase revenue to the County's lodging tax.

**MOTION:** Flowerday moved and Vest seconded approval of the recommendation and allocating \$335,000 of ARPA interest dollars to the Assemble Lincoln Convention Center Fund. Schulte, Flowerday, Vest, Amundson, and Yoakum voted yes. Motion carried 5-0.

- M.** Recommendation from the Assemble Lincoln Standing Committee to approve a Letter Agreement with Conventions, Sports & Leisure International LLC dba Legends Project Development ("CSL") to perform professional site-selection services for the Convention Center project. (C-23-0960)

Flowerday stated the upcoming vote is for approval of the contract with the consultant.

**MOTION:** Flowerday moved and Amundson seconded approval of the recommendation. Amundson, Schulte, Flowerday, Vest, and Yoakum voted yes. Motion carried 5-0.

- N.** Approval of the updated Electronic Device Surplus Policy.

**MOTION:** Amundson moved and Flowerday seconded approval of the policy. Vest, Amundson, Schulte, Flowerday, and Yoakum voted yes. Motion carried 5-0.

- O.** Recommendation from the Personnel Policy Board to amend the following:

1. Rule 17.24 – Education Loan Forgiveness
2. Rule 17.27 – Hiring and Retention Incentive

Etherton stated the changes are the same as Item 5D but for different positions. Yoakum noted the changes will be helpful for hiring and retaining employees. Etherton stated that only licenses healthcare workers will receive the incentive.

**MOTION:** Vest moved and Amundson seconded approval of the recommendation. Flowerday, Vest, Amundson, Schulte, and Yoakum voted yes. Motion carried 5-0.

## **6) EXECUTIVE SESSION (Legal Advice and Union Negotiations)**

**MOTION:** Vest moved and Amundson seconded to enter Executive Session at 9:47 a.m. for the purpose of receiving legal advice, union negotiations, and to protect the public interest.

The Chair stated it had been moved and seconded that the Board enter Executive Session and restated the purpose.

**ROLL CALL:** Schulte, Flowerday, Vest, Amundson, and Yoakum voted yes. Motion carried 5-0.

The Chair restated the purpose for the Board entering Executive Session.

**MOTION:** Vest moved and Amundson seconded to exit Executive Session at 10:24 a.m. Amundson, Schulte, Flowerday, Vest, and Yoakum voted yes. Motion carried 5-0.

**7) PUBLIC COMMENT** - Those wishing to speak on items relating to County business not on the agenda may do so at this time.

Laurie Hoyt, Lancaster resident, distributed a packet on foreign election interference (Exhibit 1) and described its contents. She asked the Board to use paper ballots for elections.

Robert Borer, Lancaster resident, described our form of government and founding documents.

## **8) ANNOUNCEMENTS**

- A.** The Lancaster County Board of Commissioners will not hold a staff meeting on Thursday, December 14, 2023, due to attending the Nebraska Association of County Officials (NACO) annual conference in Kearney.
- B.** The Lancaster County Board of Commissioners will hold the following meetings on Tuesday, December 19, 2023 starting at 9:00 a.m. in Room 112 of the County-City Building (555 S. 10th Street, Lincoln).
  - 1. Regular Board of Commissioners
  - 2. Board of Equalization meeting immediately following the Board of Commissioners meeting
  - 3. Special staff meeting immediately following the Board of Equalization meeting.
- C.** County Commissioners can be reached at 402-441-7447 or [commish@lancaster.ne.gov](mailto:commish@lancaster.ne.gov).
- D.** The Lancaster County Board of Commissioners meeting is broadcast live on LNKTv ([LNKTv.lincoln.ne.gov](http://LNKTv.lincoln.ne.gov)). LNKTv is available on Allo channel 2 and Spectrum channel 1300. For the rebroadcast schedule visit [lincoln.ne.gov](http://lincoln.ne.gov) (keyword: LNKTv). Meetings are also streamed live on YouTube and Facebook ([YouTube.com/LNKTvcity](https://www.youtube.com/LNKTvcity) and [Facebook.com/lancasterne](https://www.facebook.com/lancasterne)). LNKTv apps are also available on Roku, Apple TV and Amazon Fire TV.

## **9) ADJOURNMENT**

**MOTION:** Vest moved and Amundson seconded to adjourn at 10:35 a.m. Vest, Amundson, Schulte, Flowerday, and Yoakum voted yes. Motion carried 5-0.

  
Matt Hansen  
Lancaster County Clerk

## Declaration of Terpsehore P Maras

Pursuant to 28 U.S.C Section 1746, I, Terpsehore P Maras, make the following declaration.

1. I am over the age of 21 years and I am under no legal disability, which would prevent me from giving this declaration.
2. I have been a private contractor with experience gathering and analyzing foreign intelligence and acted as a LOCALIZER during the deployment of projects and operations both OCONUS and CONUS. I am a trained Cryptolinguist, hold a completed degree in Molecular and Cellular Physiology and have FORMAL training in other sciences such as Computational Linguistics, Game Theory, Algorithmic Aspects of Machine Learning, Predictive Analytics among others.
3. I have operational experience in sources and methods of implementing operations during elections both CONUS and OCONUS
4. I am an amateur network tracer and cryptographer and have over two decades of mathematical modeling and pattern analysis.
5. In my position from 1999-2014 I was responsible for delegating implementation via other contractors sub-contracting with US or 9 EYES agencies identifying connectivity, networking and subcontractors that would manage the micro operations.
6. My information is my personal knowledge and ability to detect relationships between the companies and validate that with the cryptographic knowledge I know and attest to as well as evidence of these relationships.
7. In addition, I am WELL versed due to my assignments during my time as a private contractor of how elections OCONUS (for countries I have had an assignment at) and CONUS (well versed in HAVA ACT) and more.
8. On or about October 2017 I had reached out to the US Senate Majority Leader with an affidavit claiming that our elections in 2017 may be null and void due to lack of EAC certifications. In fact Sen. Wyden sent a letter to Jack Cobb on 31 OCT 2017 advising discreetly pointing out the importance of being CERTIFIED EAC had issued a certificate to

Pro V & V and that expired on Feb 24, 2017. No other certification has been located.

9. Section 231(b) of the Help America Vote Act (HAVA) of 2002 (42 U.S.C. §15371(b)) requires that the EAC provide for the accreditation and revocation of accreditation of independent, non-federal laboratories qualified to test voting systems to Federal standards. Generally, the EAC considers for accreditation those laboratories evaluated and recommended by the National Institute of Standards and Technology (NIST) pursuant to HAVA Section 231(b)(1). However, consistent with HAVA Section 231(b)(2)(B), the Commission may also vote to accredit laboratories outside of those recommended by NIST upon publication of an explanation of the reason for any such accreditation.

United States Department of Commerce  
National Institute of Standards and Technology

**Certificate of Accreditation to ISO/IEC 17025:2017**

NVLAP LAB CODE: 200978-0

**Pro V&V**  
Huntsville, AL

*is accredited by the National Voluntary Laboratory Accreditation Program for specific services,  
listed on the Scope of Accreditation, for:*

**Voting System Testing**

*This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2017.  
This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality  
management system (refer to joint ISO-ILAC-IAF Communiqué dated January 2009).*

2020-03-26 through 2021-03-31  
*Effective Dates*

  
*For the National Voluntary Laboratory Accreditation Program*

10.

11. VSTL's are VERY important because equipment vulnerabilities allow for deployment of algorithms and scripts to intercept, alter and adjust voting tallies.

12. There are only TWO accredited VSTLs (VOTING SYSTEM TEST LABORATORIES). In order to meet its statutory requirements under HAVA §15371(b), the EAC has developed the EAC's Voting System Test Laboratory Accreditation Program. The procedural requirements of the program are established in the proposed information collection, the EAC Voting System Test Laboratory Accreditation Program Manual. Although participation in the program is voluntary, adherence to the program's procedural requirements is mandatory for participants. The procedural requirements of this Manual will supersede any prior laboratory accreditation requirements issued by the EAC. This manual shall be read in conjunction with the EAC's Voting System Testing and Certification Program Manual (OMB 3265-0019).

|                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>State Participation:</i>         | <b>Requires Testing by a Federally Accredited Laboratory.</b> WI requires that its voting systems receive approval from an independent testing authority accredited by NASED verifying that the voting systems meet all of the recommended FEC standards.                                                                                                                                                                                                                                                                                                                                                                                                           |
| <i>Applicable Statute(s):</i>       | "No ballot, voting device, automatic tabulating equipment or relating equipment and materials to be used in an electronic voting system may be utilized in this state unless it is approved by the board [of election commissioners]." <u>WIS. STAT. ANN. § 5.91</u> (West 2009).                                                                                                                                                                                                                                                                                                                                                                                   |
| <i>Applicable Regulation(s):</i>    | "An application for approval of an electronic voting system shall be accompanied by all of the following ... [r]eports from an independent testing authority accredited by the national association of state election directors (NASED) demonstrating that the voting system conforms to all the standards recommended by the federal elections commission." <u>WIS. ADMIN. CODE GAB § 7.01</u> (2009).                                                                                                                                                                                                                                                             |
| <i>State Certification Process:</i> | The Board of Election Commissioners accepts applications for the approval of electronic voting systems. Once the application is completed, the vendor must set up the voting system for three mock elections using; (1) offices, (2) referenda questions and (3) candidates. A panel of local election officials can assist the Board in the review of the voting system. The Board conducts the test using a mock election for the partisan primary, general election, and nonpartisan election. The Board may also require that the voting system be used in an actual election as a condition of the approval. <u>WIS. ADMIN. CODE GAB §§ 7.01, 7.02</u> (2009). |

|                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>State Participation:</i>         | <b>Requires Federal Certification.</b> GA requires that its voting systems are tested to EAC standards by EAC accredited labs and certified by the EAC.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <i>Applicable Statute(s):</i>       | "Any person or organization owning, manufacturing, or selling, or being interested in the manufacture or sale of, any voting machine may request the Secretary of State to examine the machine. Any ten or more electors of this state may, at any time, request the Secretary of State to reexamine any voting machine previously examined and approved by him or her. Before any such examination or reexamination, the person, persons, or organization requesting such examination or reexamination shall pay to the Secretary of State the reasonable expenses of such examination; provided, however, that in the case of a request by ten or more electors the examination fee shall be \$ 250.00. The Secretary of State may, at any time, in his or her discretion, reexamine any voting machine." <u>GA CODE ANN. § 21-2-324</u> (2008).                                |
| <i>Applicable Regulation(s):</i>    | "Prior to submitting a voting system for certification by the State of Georgia, the proposed voting system's hardware, firmware, and software must have been issued Qualification Certificates from the EAC. These EAC Qualification Certificates must indicate that the proposed voting system has successfully completed the EAC Qualification testing administered by EAC approved ITAs. If for any reason, this level of testing is not available, the Qualification tests shall be conducted by an agency designated by the Secretary of State. In either event, the Qualification tests shall comply with the specifications of the <i>Voting Systems Standards</i> published by the EAC." <u>GA. COMP. R. &amp; RES. 590-8-1-.01</u> (2009).                                                                                                                               |
| <i>State Certification Process:</i> | After the voting system has passed EAC Qualification testing, the vendor of the voting system submits a letter to the Office of the Secretary of State requesting certification for the voting system along with a technical data package to the certification agent. An evaluation proposal is created by the certification agent after a preliminary view of the Technical Data Package and sent to the vendor. Any additional EAC ITA testing identified in the evaluation proposal is arranged by the vendor and the certification agent will perform all other tests identified in the evaluation proposal. The certification agent submits a report of their findings to the Secretary of State. Based on these findings the Secretary of State will make a final determination on whether to certify the voting system. <u>GA. COMP. R. &amp; RES. 590-8-1-.01</u> (2009). |

| <i>State Participation:</i>         | <b>Requires Testing by a Federally Accredited Laboratory.</b> PA requires that its voting systems are approved by a federally recognized independent testing laboratory as meeting federal voting system standards.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <i>Applicable Statute(s):</i>       | "Any person or corporation owning, manufacturing or selling, or being interested in the manufacture or sale of, any electronic voting system, may request the Secretary of the Commonwealth to examine such system if the voting system has been examined and approved by a federally recognized independent testing authority and if it meets any voting system performance and test standards established by the Federal Government." <u>25 PA. CONS. STAT. ANN. Code § 3031.5</u> (West 2008).                                                                                                                                                                                                                                             |
| <i>Applicable Regulation(s):</i>    | PA does not have a regulation regarding the federal certification process.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <i>State Certification Process:</i> | The Secretary of State examines voting systems, upon request, once the voting systems have received approval by a federally recognized independent testing authority. The person(s) requesting the examination of the voting system are responsible for the cost of the examination. After the examination, the Secretary of State issues a report stating whether or not the voting systems are safe and compliant with state and federal requirements. If the voting systems are deemed safe and compliant by the Secretary of State then the systems may be adopted and approved for use in elections by each county through a majority vote of its qualified electors. <u>25 PA. CONS. STAT. ANN. Code §§ 3031.5, 3031.2</u> (West 2008). |
| <i>Fielded Voting Systems:</i>      | <i>[After the EAC completes and issues the 2008 Election Administration and Voting Survey, information about fielded voting systems will be added to this document. In the meantime, readers may find information on the voting systems at the following website (if available)].</i><br><a href="http://www.votspa.com/HowtoVote/tabid/74/language/en-US/Default.aspx">http://www.votspa.com/HowtoVote/tabid/74/language/en-US/Default.aspx</a>                                                                                                                                                                                                                                                                                              |

17.

18. **Pro V& V and SLI Gaming** both lack evidence of EAC Accreditation as per the Voting System Testing and Certification Manual.

19. **Pro V& V** is owned and Operated by Jack Cobb. Real name is Ryan Jackson Cobb. The company ProV&V was founded and run by Jack Cobb who formerly worked under the entity of Wyle Laboratories which is an AEROSPACE DEFENSE CONTRACTING ENTITY. The address information on the EAC, NIST and other entities for Pro V& V are different than that of what is on ProV&V website. The EAC and NIST (ISO CERT) issuers all have another address.

The screenshot shows a web browser window with the URL <https://eac-legacy-admin.com/voting-equipment/voting-system-test-laboratories-vtt/>. The page features a search bar with 'SEARCH' and 'CLEAR' buttons. Below the search bar, the heading 'Accredited Labs' is displayed. A message indicates '2 results found. Page 1 of 1'. The first result is for 'Pro V&V', located at 703 Boulevard South, Suite 102, Huntsville, AL 35892. It lists the status as 'Accredited', the program manager as Jack Cobb, President, and the phone number as 256-713-1111. A 'Learn More >' link is provided. The second result is for 'SLI Compliance, a Division of Gaming Laboratories International, LLC', located at 4720 Independence Street, Wheat Ridge, CO 80033. It also lists the status as 'Accredited', the program manager as Traci Mapps, Director of Operations, and the phone number as 303-422-1566. A 'Learn More >' link is provided. On the right side of the page, there are links for 'Frequently Asked Questions', 'Manuals and Forms', and 'Test and Certification Blogs'. Below these, there is a section titled 'DO YOU HAVE QUESTIONS?' with a 'Contact Us' button (link opens in new tab). At the bottom right, there is a 'REGISTER TO VOTE!' section with a 'Register Today' button.

The screenshot shows a web browser window with the URL [www.provav.com](http://www.provav.com). The page displays a contact form with the following fields: 'Your Name (required)', 'Your Email (required)', 'Subject', and 'Your Message'. To the right of the form, the contact information for Pro V&V is listed: 6705 Odyssey Drive NW, Suite C, Huntsville, AL 35896, Office: 256-713-1111, and Fax: 256-713-1112. A 'Send' button is located below the form. The footer of the page states '© 2020 ProV&V Inc. All rights reserved.' and 'Theme by Wpexpert'.

20. VSTLs are the most important component of the election machines as they examine the use of COTS (Commercial Off-The-Shelf)
21. "Wyle became involved with the testing of electronic voting systems in the early 1990's and has tested over 150 separate voting systems. Wyle was the first company to obtain accreditation by the National Association of State Election Directors (NASED). Wyle is accredited by the Election Assistance Commission (EAC) as a Voting System Testing Laboratory (VSTL). Our scope of accreditation as a VSTL encompasses all aspects of the hardware and software of a voting machine. Wyle also received NVLAP accreditation to ISO/IEC 17025:2005 from NIST." Testimony of Jack Cobb 2009
22. COTS are preferred by many because they have been tried and tested in the open market and are most economic and readily available. COTS are also the SOURCE of vulnerability therefore VSTLs are VERY important. COTS components by voting system machine manufacturers can be used as a "Black Box" and changes to their specs and hardware make up change continuously. Some changes can be simple upgrades to make them more efficient in operation, cost efficient for production, end of life (EOL) and even complete reworks to meet new standards. The key issue in this is that MOST of the COTS used by Election Machine Vendors like Dominion, ES&S, Hart Intercivic, Smartmatic and others is that such manufacturing for COTS have been outsourced to China which if implemented in our Election Machines make us vulnerable to BLACK BOX antics and backdoors due to hardware changes that can go undetected. This is why VSTL's are VERY important.
23. The proprietary voting system software is done so and created with cost efficiency in mind and therefore relies on 3<sup>rd</sup> party software that is AVAILABLE and HOUSED on the HARDWARE. This is a vulnerability. Exporting system reporting using software like Crystal Reports, or PDF software allows for vulnerabilities with their constant updates.
24. As per the COTS hardware components that are fixed, and origin may be cloaked under proprietary information a major vulnerability exists since once again third-party support software is dynamic and requires FREQUENT updates. The hardware components of the computer components, and election machines that are COTS may have slight updates that can be overlooked as they may be like those designed that support the other third -party software. COTS origin is important and the US Intelligence Community report in 2018 verifies that.
25. The Trump Administration made it clear that there is an absence of a major U.S. alternative to foreign suppliers of networking equipment. This highlights the growing dominance of

Chinese manufacturers like Huawei that are the world's LARGEST supplier of telecom and other equipment that endangers national security.

26. China, is not the only nation involved in COTS provided to election machines or the networking but so is Germany via a LAOS founded Chinese linked cloud service company that works with SCYTL named Akamai Technologies that have offices in China and are linked to the server that Dominion Software.

- 27.
28. L3 Level Communications is federal contractor that is partially owned by foreign lobbyist George Soros. An article that AP ran in 2010 – spoke out about the controversy of this that has been removed. [\(LINK\)](#) “As for the company’s other political connections, it also appears that none other than George Soros, the billionaire funder of the country’s liberal political infrastructure, owns 11,300 shares of OSI Systems Inc., the company that owns Rapisan. Not surprisingly, OSI’s stock has appreciated considerably over the course of the year. Soros certainly is a savvy investor.” Washington Examiner re-write.

30.

31. **L-3 Communication Systems-East** designs, develops, produces and integrates communication systems and support equipment for space, air, ground, and naval applications, including C4I systems and products; integrated Navy communication systems; integrated space communications and RF payloads; recording systems; secure communications, and information security systems. In addition, their site claims that MARCOM is an integrated communications system and The Marcom® is the foundation of the Navy's newest digital integrated voice / data switching system for affordable command and control equipment supporting communications and radio room automation. The MarCom® uses the latest **COTS** digital technology and open systems standards to offer the command and control user a low cost, user friendly, solution to the complex voice, video and data communications needs of present and future joint / allied missions. Built in reliability, rugged construction, and fail-safe circuits ensure your call and messages will go through. Evidently a HUGE vulnerability.

32. Michigan's government site is thumped off Akamai Technologies servers which are housed on **TELIA AB** a foreign server located in Germany.
33. Scytl, who is contracted with AP that receives the results tallied BY Scytl on behalf of Dominion – During the elections the AP reporting site had a disclaimer.  
AP – powered by SCYTL.

34. "Scytl was selected by the Federal Voting Assistance Program of the U.S. Department of Defense to provide a secure online ballot delivery and onscreen marking systems under a program to support overseas military and civilian voters for the 2010 election cycle and beyond. Scytl was awarded 9 of the 20 States that agreed to participate in the program (New York, Washington, Missouri, Nebraska, Kansas, New Mexico, South Carolina, Mississippi and Indiana), making it the provider with the highest number of participating States." [PDF](#)
35. According to DOMINION : 1.4.1 Software and Firmware The software and firmware employed by Dominion D-Suite 5.5-A consists of 2 types, custom and commercial off the shelf (COTS). COTS applications were verified to be pristine or were subjected to source code review for analysis of any modifications and verification of meeting the pertinent standards.
36. The concern is the HARDWARE and the NON – ACCREDITED VSTLs as by their own admittance use COTS.
37. The purpose of VSTL's being accredited and their importance in ensuring that there is no foreign interference/ bad actors accessing the tally data via backdoors in equipment software. The core software used by ALL SCYTL related Election Machine/Software manufacturers ensures "anonymity".
38. Algorithms within the area of this "shuffling" to maintain anonymity allows for setting values to achieve a desired goal under the guise of "encryption" in the trap-door.
39. The actual use of trapdoor commitments in Bayer-Groth proofs demonstrate the implications for the verifiability factor. This means that no one can SEE what is going on during the process of the "shuffling" therefore even if you deploy an algorithms or manual scripts to fractionalize or distribute pooled votes to achieve the outcome you wish – you cannot prove they are doing it! See STUDY : ["The use of trapdoor commitments in Bayer-Groth proofs and the implications for the verifiability of the Scytl-SwissPost Internet voting system"](#)

#### 40. Key Terms

41. **UNIVERSAL VERIFIABILITY:** Votes cast are the votes counted and integrity of the vote is verifiable (the vote was tallied for the candidate selected) . **SCYTL FAILS UNIVERSAL VERIFIABILITY** because no mathematical proofs can determine if any votes have been manipulated.
42. **INDIVIDUAL VERIFIABILITY:** Voter cannot verify if their ballot got correctly counted. Like, if they cast a vote for ABC they want to verify it was ABC. That notion clearly discounts the need for anonymity in the first place.

43. To understand what I observed during the 2020 I will walk you through the process of one ballot cast by a voter.
44. STEP 1 |Config Data | All non e-voting data is sent to Scytl (offshore) for configuration of data. All e-voting is sent to CONFIGURATION OF DATA then back to the e-voting machine and then to the next phase called CLEANSING. **CONCERNS:** Here we see an “OR PROOF” as coined by mathematicians – an “or proof” is that votes that have been pre-tallied parked in the system and the algorithm then goes back to set the outcome it is set for and seeks to make adjustments if there is a partial pivot present causing it to fail demanding manual changes such as block allocation and narrowing of parameters or self-adjusts to ensure the predetermined outcome is achieved.
45. STEP 2|CLEANSING | The Process is when all the votes come in from the software run by Dominion and get “cleansed” and put into 2 categories: invalid votes and valid votes.
46. STEP 3|Shuffling /Mixing | This step is the most nefarious and exactly where the issues arise and carry over into the decryption phase. Simply put, the software takes all the votes, literally mixes them and then re-encrypts them. This is where if ONE had the commitment key- TRAPDOOR KEY – one would be able to see the parameters of the algorithm deployed as the votes go into this mixing phase, and how algorithm redistributes the votes.
47. This published PAPER FROM University College London depicts how this shuffle works. In essence, when this mixing/shuffling occurs, then one doesn’t have the ability to know that vote coming out on the other end is actually their vote; therefore, ZERO integrity of the votes when mixed.

48.

## Background - ElGamal encryption

- Setup: Group  $\mathcal{G}$  of prime order  $q$  with generator  $g$
- Public key:  $pk = y = g^x$
- Encryption:  $\mathcal{E}_{pk}(m; r) = (g^r, y^r m)$
- Decryption:  $\mathcal{D}_x(u, v) = vu^{-x}$
- Homomorphic:

$$\mathcal{E}_{pk}(m; r) \times \mathcal{E}_{pk}(M; R) = \mathcal{E}_{pk}(mM; r + R)$$

- Re-encryption:

$$\mathcal{E}_{pk}(m; r) \times \mathcal{E}_{pk}(1; R) = \mathcal{E}_{pk}(m; r + R)$$

49. When this mixing/shuffling occurs, then one doesn't have the ability to know that vote coming out on the other end is actually their vote; therefore, ZERO integrity of the votes.
50. When the votes are sent to Scytal via Dominion Software EMS (Election Management System) the Trap Door is accessed by Scytal or TRAP DOOR keys (Commitment Parameters).

52. The encrypted data is shifted into Scytal's platform in the form of ciphertexts – this means it is encrypted and a key based on commitments is needed to read the data. The ballot data can only be read if the person has a key that is set on commitments.
53. A false sense of security is provided to both parties that votes are not being “REPLACED” during the mixing phase. Basically, Scytal re-encrypts the ballot data that comes in from Dominion (or any other voting software company) as ciphertexts. Scytal is supposed to prove that votes A, B, C are indeed X, Y, Z under their new re-encryption when sending back the votes that are tallied coding them respectively. This is done by Scytal and the Election Software company that agrees to certain

“Generators” and therefore together build “commitments.”

```
public CommitmentParams(final ZpSubgroup group, final int n) {
    group = group;
    h = GroupTools.getRandomElement(group);
    commitmentlength = n;
    g = GroupTools.getVectorRandomElement(group,
    this.commitmentlength);
}

// from getRandomElement(group)
Exponent randomExponent = ExponentTools.getRandomExponent(group.getQ());
return group.getGenerator().exponentiate(randomExponent);
```

54. Scytal and Dominion have an agreement – only the two would know the parameters. This means that access is able to occur through backdoors in hardware if the parameters of the commitments are known in order to alter the range of the algorithm deployed to satisfy the outcome sought in the case of algorithm failure.
55. Trapdoor is a cryptotech term that describes a state of a program that knows the commitment parameters and therefore is able change the value of the commitments however it likes. In other words, Scytal or anyone that knows the commitment parameters can take all the votes and give them to any one they want. If they have a total of 1000 votes an algorithm can distribute them among all races as it deems necessary to achieve the goals it wants. (Case Study: Estonia)

$$\text{Commitment}_{\text{CRYPT}} = \text{CM}_c$$

Say I sets commitment - simple math

$$\text{CM}_c(\vec{a}; r) = H(g_1^n) = 1 \cdot G_1^{a_i}$$

$$\text{CM}_c(\vec{a}; r) = H\left(g_1^r + \sum_{i=1}^n (a_i - z_i) e_i \prod_{j=1}^n g_j^{z_j}\right)$$

$$\text{CM}_c(\vec{a}; r) = \text{CM}_c(\vec{z}; r')$$

$$r' = r + \sum_{i=1}^n e_i (a_i - z_i)$$

56.

57. Within the trapdoor this is how the algorithm behaves to move the goal posts in elections without being detected by this proof. During the mixing phase this is the algorithm you would use to

“reallocate” votes via an algorithm to achieve the goal set.

58. STEP 4|Decryption would be the decryption phase and temporary parking of vote tallies before reporting. In this final phase before public release the tallies are released from encrypted format into plain text. As previously explained, those that know the trapdoor can easily change any votes that the randomness is applied and used to generate the tally vote ciphertext. Thus in this case, Scyt1 who is the mixer can collude with their vote company clients or an agency (-----) to change votes and get away with it. This is because the receiver doesn't have the decryption key so they rely solely on Scyt1 to be **honest** or free from any foreign actors within their backdoor or the Election Company (like Dominion) that can have access to the key.
59. In fact, a study from the University of Bristol made claim that interference can be seen when there is a GREAT DELAY in reporting and finalizing numbers University of Bristol : How not to Prove Yourself: Pitfalls of the Fiat-Shamir Heuristic and Applications to Helios
60. “Zero-knowledge proofs of knowledge allow a prover to convince a verifier that she holds information satisfying some desirable properties without revealing anything else.” David Bernhard, Olivier Pereira, and Bogdan Warinschi.

61. Hence, you can't prove anyone manipulated anything. The TRAP DOOR KEY HOLDERS can offer you enough to verify to you what you need to see without revealing anything and once again indicating the inability to detect manipulation. **ZERO PROOF of INTEGRITY OF THE VOTE.**
62. Therefore, if decryption is challenged, the administrator or software company that knows the trap door key can provide you proof that would be able to pass verification (blind). This was proven to be factually true in the case study by The University of Melbourne in March. White Hat Hackers purposely altered votes by knowing the parameters set in the commitments and there was no way to prove they did it – or any way to prove they didn't.
63. IT'S THE PERFECT THREE CARD MONTY. That's just how perfect it is. They fake a proof of ciphertexts with KNOWN "RANDOMNESS". This rolls back to the integrity of the VOTE. The vote is not safe using these machines not only because of the method used for ballot "cleansing" to maintain anonymity but the EXPOSURE to foreign interference and possible domestic bad actors.
64. In many circumstances, manipulation of the algorithm is NOT possible in an undetectable fashion. This is because it is one point heavy. Observing the elections in 2020 confirm the deployment of an algorithm due to the BEHAVIOR which is indicative of an algorithm in play that had no pivoting parameters applied.
65. The behavior of the algorithm is that one point (B) is the greatest point within the allocated set. It is the greatest number within the A B points given. Point A would be the smallest. Any points outside the A B points are not necessarily factored in yet can still be applied.
66. The points outside the parameters can be utilized to a certain degree such as in block allocation.
67. The algorithm geographically changed the parameters of the algorithm to force blue votes and ostracize red.
68. Post block allocation of votes the two points of the algorithm were narrowed ensuring a BIDEN win hence the observation of NO Trump Votes and some BIDEN votes for a period of time.

# ARIZONA

## "FIXING" THE VOTE

\*DATA SOURCED FROM NEW YORK TIMES

### SUMMARY

- Mathematical evidence of the seeding "injection" of votes at the beginning
- A spike means that a large number of votes were injected into the totals
- A normal vote pattern would look like a natural progression – smooth without extreme jumps

70. Gaussian Elimination without pivoting explains how the algorithm would behave and the election results and data from Michigan confirm FAILURE of algorithm.

71. The "Digital Fix" observed with an increased spike in VOTES for Joe Biden can be determined as evidence of a pivot. Normally it would be assumed that the algorithm had a Complete Pivot. Wilkinson's demonstrated the guarantee as :

$$\frac{\|U\|_{\infty}}{\|A\|_{\infty}} \leq n^{\frac{1}{2} \log(n)}$$

72.

73. Such a conjecture allows the growth factor the ability to be upper bound by values closer to  $n$ . Therefore, complete pivoting can't be observed because there would be too many floating points. Nor can partial as the partial pivoting would overwhelm after the "injection" of votes. Therefore, external factors were used which is evident from the "DIGITAL FIX"
74. Observing the elections, after a review of Michigan's data a spike of 54,199 votes to Biden. Because it is pushing and pulling and keeping a short distance between the 2 candidates; but then a spike, which is how an algorithm presents; - and this spike means there was a pause and an insert was made, where they insert an algorithm. Block spikes in votes for JOE BIDEN were NOT paper

ballots being fed or THUMB DRIVES. The algorithm block adjusted itself and the PEOPLE were creating the evidence to BACK UP the block allocation.

75. I have witnessed the same behavior of the election software in countries outside of the United States and within the United States. In -----, the elections conducted behaved in the same manner by allocating BLOCK votes to the candidate “chosen” to win.
76. Observing the data of the contested states (and others) the algorithm deployed is identical to that which was deployed in 2012 providing Barack Hussein Obama a block allocation to win the 2012 Presidential Elections.
77. The algorithm looks to have been set to give Joe Biden a 52% win even with an initial 50K+ vote block allocation was provided initially as tallying began (as in case of Arizona too). In the am of November 4, 2020 the algorithm stopped working, therefore another “block allocation” to remedy the failure of the algorithm. This was done manually as ALL the SYSTEMS shut down NATIONWIDE to avoid detection.

## GEORGIA “FIXING” THE VOTE

\*DATA SOURCED FROM NEW YORK TIMES

### SUMMARY

- The spike on the morning of Nov. 4 resulted in a net increase of 107,040 to Biden's total
- A spike means that a large number of votes were injected into the totals
- A normal vote pattern would look like a natural progression – smooth without

- 78.
79. In Georgia during the 2016 Presidential Elections a failed attempt to deploy the scripts to block allocate votes from a centralized location where the “trap-door” key lay an attempt by someone using

80. In the state of Wisconsin, we observed a considerable BLOCK vote allocation by the algorithm at the SAME TIME it happened across the nation. All systems shut down at around the same time.

2 million votes

1.5m

1m

Republican votes

Democratic votes

Brown and Kenosha counties are still counting.

An estimated 381k more votes have not yet been counted

82. In Wisconsin there are also irregularities in respect to BALLOT requests. (names AND address  
Hidden for privacy)

[illegible]

84.

April 21, 2014

## EMAIL

President Obama and Vice President Biden have made U.S. support for Ukraine an urgent priority as the Ukrainian government works to establish security and stability, pursue democratic elections and constitutional reform, revive its economy, and ensure government institutions are transparent and accountable to the Ukrainian people. Ukraine embarks on this reform path in the face of severe challenges to its sovereignty and territorial integrity, which we are working to address together with Ukraine and our partners in the international community. The United States is committed to ensuring that Ukrainians alone are able to determine their country's future without intimidation or coercion from outside forces. To support Ukraine, we are today announcing a new package of assistance totaling **\$50 million** to help Ukraine pursue political and economic reform and strengthen the partnership between the United States and Ukraine.

91. Right before the ----- elections it was alleged that CyberBerkut a pro-Russia group infiltrated --- central election computers and **deleted key files**. These actions supposedly rendered the vote-tallying system inoperable.
92. In fact, the KEY FILES were the Commitment keys to allow Scytl to tally the votes rather than the election machines. The group had disclosed emails and other documents proving that their election was rigged and that they tried to avoid a fixed election.
93. The elections were held on May 25, 2014 but in the early AM hours the election results were BLOCKED and the final tally was DELAYED flipping the election in favor of -----.
94. The claim was that there was a DDoS attack by Russians when in actual fact it was a mitigation of the algorithm to inject block votes as we observed was done for Joe Biden because the KEYS were unable to be deployed. In the case of -----, the trap-door key was “altered”/deleted/ rendered ineffective. In the case of the US elections, representatives of Dominion/ ES&S/ Smartmatic/ Hart Intercivic would have to manually deploy them since if the entry points into the systems seemed to have failed.
95. The vote tallying of all states NATIONWIDE stalled and hung for days – as in the case of Alaska that has about 300K registered voters but was stuck at 56% reporting for almost a week.
96. This “hanging” indicates a failed deployment of the scripts to block allocate remotely from one location as observed in ----- on May 26, 2014.
97. This would justify the presence of the election machine software representatives making physical appearances in the states where the election results are currently being contested.
98. A Dominion Executive appeared at the polling center in Detroit after midnight.
99. Considering that the hardware of the machines has NOT been examined in Michigan since 2017 by Pro V& V according to Michigan’s own reporting. COTS are an avenue that hackers and bad actors seek to penetrate in order to control operations. Their software updates are the reason vulnerabilities to foreign interference in all operations exist.
100. The importance of VSTLs in underrated to protect up from foreign interference by way of open access via COTS software. Pro V& V who’s EAC certification EXPIRED on 24 FEB 2017 was contracted with the state of WISCONSIN.
101. In the United States each state is tasked to conduct and IV& V (Independent Verification and Validation) to provide assurance of the integrity of the votes.
102. If the “accredited” non-federal entities have NOT received EAC accreditation this is a failure of the states to uphold their own states standards that are federally regulated.
103. In addition, if the entities had NIST certificates they are NOT sufficing according the HAVA ACT 2002 as the role of NIST is clear.
104. Curiously, both companies PRO V&V and SLI GAMING received NIST certifications OUTSIDE the 24 month scope.

105. PRO V& V received a NIST certification on 26MAR2020 for ONE YEAR. Normally the NIST certification is good for two years to align with that of EAC certification that is good for two years.

106.

107. The last PRO V& V EAC accreditation certificate (Item 8) of this declaration expired in February 2017 which means that the IV & V conducted by Michigan claiming that they were accredited is false.
108. The significance of VSTLs being accredited and examining the HARDWARE is key. COTS software updates are the avenues of entry.
109. As per DOMINION'S own petition, the modems they use are COTS therefore failure to have an accredited VSTL examine the hardware for points of entry by their software is key.

|                      |                                                                                                                                                                                                                                           |  |                                                                                |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--------------------------------------------------------------------------------|

110.

111. For example and update of Verizon USB Modem Pantech undergoes multiple software updates a year for it's hardware. That is most likely the point of entry into the systems.

112. During the 2014 elections in ---- it was the modems that gave access to the systems where the commitment keys were deleted.

113. SLI Gaming is the other VSTL "accredited" by the EAC BUT there is no record of their accreditation. In fact, SLI was NIST ISO Certified 27 days before the election which means that PA IV&V was conducted without NIST cert for SLI being valid.

United States Department of Commerce  
National Institute of Standards and Technology

**Certificate of Accreditation to ISO/IEC 17025:2017**

*This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2017.  
This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality  
management system (refer to joint ISO-ILAC-IAF Communiqué dated January 2009).*

*[Signature]*  
For the National Voluntary Laboratory Accreditation Program

- 114.
115. In fact SLI was NIST ISO Certified for less than 90 days.
116. I can personally attest that high-level officials of the Obama/Biden administration and large private contracting firms met with a software company called GEMS which is ultimately the software ALL election machines run now running under the flag of DOMINION.
117. GEMS was manifested from SOE software purchased by SCYTL developers and US Federally Funded persons to develop it.
118. The only way GEMS can be deployed across ALL machines is IF all counties across the nation are housed under the same server networks.
119. GEMS was tasked in 2009 to a contractor in Tampa, Fl.
120. GEMS was also fine-tuned in Latvia, Belarus, Serbia and Spain to be localized for EU deployment as observed during the Swissport election debacle.
121. John McCain's campaign assisted in FUNDING the development of GEMS web monitoring via WEB Services with 3EDC and Dynology.

130.

131. AKAMAI Technologies has locations around the world.

132. AKAMAI Technologies has locations in China (ref item 22)

133. AKAMAI Technologies has locations in Iran as of 2019.

134. AKAMAI Technologies merged with UNICOM (CHINESE TELECOMM) in 2018.

135. AKAMAI Technologies house all state .gov information in GERMANY via TELIA AB.

136. In my professional opinion, this affidavit presents unambiguous evidence:
137. That there was Foreign interference, complicit behavior by the previous administrations from 1999 up until today to hinder the voice of the people and US persons knowingly and willingly colluding with foreign powers to steer our 2020 elections that can be named in a classified setting.
138. Foreign interference is present in the 2020 election in various means namely,
139. Foreign nationals assisted in the creation of GEMS (Dominion Software Foundation)
140. Akamai Technologies merged with a Chinese company that makes the COTS components of the election machines providing access to our electronic voting machines.
141. Foreign investments and interests in the creation of the GEMS software.
142. US persons holding an office and private individuals knowingly and willingly oversaw fail safes to secure our elections.
143. The EAC failed to abide by standards set in HAVA ACT 2002.
144. The IG of the EAC failed to address complaints since their appointment regarding vote integrity
145. Christy McCormick of the EAC failed to ensure that EAC conducted their duties as set forth by HAVA ACT 2002
146. Both Patricia Layfield (IG of EAC) and Christy McCormick (Chairwoman of EAC) were appointed by Barack Hussein Obama and have maintained their positions since then.
147. The EAC failed to have a quorum for over a calendar year leading to the inability to meet the standards of the EAC.
148. AKAMAI Technologies and Hurricane Electric raise serious concerns for NATSEC due to their ties with foreign hostile nations.
149. For all the reasons above a complete failure of duty to provide safe and just elections are observed.
150. For the people of the United States to have confidence in their elections our cybersecurity standards should not be in the hands of foreign nations.
151. Those responsible within the Intelligence Community directly and indirectly by way of procurement of services should be held accountable for assisting in the development, implementation and promotion of GEMS.
152. GEMS ----- General Hayden.
153. In my opinion and from the data and events I have observed ----- with the assistance of SHADOWNET under the guise of L3-Communications which is MPRI. This is also confirmed by us.army.mil making the statement that shadownet has been deployed to 30 states which all

happen to be using Dominion Machines.

---

FAIRFAX, Va. -The Virginia National Guard's Bowling Green-based 91st Cyber Brigade completed the nationwide rollout of its ShadowNet enterprise solution July 19, 2019, with the integration of the 125th Cyber Protection Battalion into the solution's virtual private network. ShadowNet is a custom-built private cloud-based out of the brigade's data center in Fairfax, Virginia, that uses VPN connectivity to provide its aligned units with 24-hour, seven-days-a-week remote access to critical cyber training at both the collective and individual levels. The brigade successfully integrated its three other cyber protection battalions - the 123rd, 124th, and 126th Cyber Protection Battalions - into the ShadowNet platform last January.

"I'm extremely proud to announce that the Soldiers of the 91st Cyber Brigade have completed the construction and rollout of ShadowNet, a world-class enterprise solution designed to propel operational innovation in the field of cyber training," said Col. Adam C. Volant, commander of the 91st Cyber Brigade. "ShadowNet will allow us to leverage the expertise of cyber professionals across our four cyber protection battalions to build Soldier-centric programs and collective training environments that deliver breakthrough in exercise complexity and cost efficiency. Its robust
